What

She Looks Like a Cardiologist: Developing Pathways for High School Girls to Pursue a Career in Cardiology, a free virtual event offered by the MidWest Women in Cardiology Alliance.

Who

This event is intended to inspire **female junior and senior high school students** with an interest in science, research, or medicine to consider the exciting field of Cardiology.

When

This event will stream live on **Saturday, February 27, 2021, from 10:30 am-1:00 pm (EST)**.

Background

Cardiovascular disease is the #1 killer of all Americans, and we need bright, talented, and motivated young minds to join us in addressing this issue for future generations. Our research shows that while ~50% of medical students are female, only a small fraction of these women chooses to specialize in Cardiology. The MidWest Women in Cardiology Alliance wants to show you what life is like as a female cardiologist in the hopes that one day you, too, will **#ChooseCardiology**.

Video Introduction

A brief introduction to the ***She Looks Like a Cardiologist*** program can be seen via the following link:
<https://youtu.be/uH5uDFJnTlw>

Program Content & Why You Should Participate

The program will cover sub-specialties within Cardiology including General Cardiology, Cardiac Imaging, Interventional Cardiology, Electrophysiology, and Advanced Heart Failure. We will have female cardiologists from Michigan, Ohio, Illinois, Indiana, Iowa, and Wisconsin participating in live Q&A sessions. This will be a great opportunity to connect with mentors in your area.

The American College of Cardiology envisions a world where innovation and knowledge optimize cardiovascular care and outcomes. As the professional home for the entire cardiovascular care team, the mission of the College and its 54,000 members is to transform cardiovascular care and to improve heart health. The ACC bestows credentials upon cardiovascular professionals who meet stringent qualifications and leads in the formation of health policy, standards and guidelines. The College also provides professional medical education, disseminates cardiovascular research through its world-renowned *JACC Journals*, operates national registries to measure and improve care, and offers cardiovascular accreditation to hospitals and institutions.
